Dos Don'ts Recommended Browser Audio Example Payment Instructions

Please read the following instructions carefully and complete

Creating a speech-to-text system requires significant effort in order to get the best possible quality, the recordings and text need to be clean, consistent and realistic. To that end, please follow these instructios

Search anything...

In this task you will be presented with an audio clip. Listen carefully to every word uttered and type out whatever you heard in the text box provided. It is very important that the typed words match the audio clip exactly. If you accidentally type an un-uttered word, please delete it. You may also be provided with an initial or draft transcript. After listening to the audio, correct the draft transcript till it exactly matches the audio. If the draft transcript is already accurate and matches the audio perfectly, please skip to the next clip.

It is best to listen in a quiet environment with headphones or earphones to make sure you can hear the words in the audio clip. If there are multiple speakers, type the words exactly as you heard them.

Check your spellings before submitting each transcript. Feel free to install a **Spell Checker** browser add-on like Grammarly by Google to help with vigorous spell-checking. It's free! If you are unsure how a word is correctly spelt, look it up on Google and use only the right spelling. Where multiple alternate spellings exists, pick the British version.

Where they exist in the audio, please skip or ignore word fillers (dysfluencies) like "Err", "Umm", "Erm". They should not be included in your transcripts

Some audio clips will be totally or partially inaudible, garbled, corrupted, or difficult to transcribe. Some audio clips will contain background noise or music. In these cases, listen very intently to make a best guess of what is being said and transcribe to your best possible ability. Transcribe all words that can be heard clearly and omit words that are impossible to hear. For absolutely inaudible words, omit/skip them. **DO NOT TYPE [inaudible] in place of inaudible words.**
But if the entire clip is completely inaudible or the entire clip contains music simply skip to the next audio clip in your queue.

Some audio clips will contain multiple speakers. Use the **"Paste Timestamp"** button to mark the exact moment when a new speaker starts talking. Next to the button is a **Speaker** dropdown—select "Timestamp only" if you just need the time marker, or choose Speaker 1, Speaker 2, or Speaker 3 to automatically insert a consistent speaker tag below the timestamp when you click. This ensures uniform formatting and avoids spelling inconsistencies. If the project provides a **Tag** dropdown next to the Speaker dropdown, use it to mark things like background noise or music in the transcript: place your cursor where the effect occurs, select a tag from the dropdown (e.g. <noise>, <music>), and it will be inserted there; the dropdown then resets so you can insert more tags as needed. Click Paste Timestamp at the precise moment you hear a speaker change. Transcribe each speaker's words on a **NEW LINE**. Here's an example:

[00:00:05]
[Speaker 1]: OK, and how would you describe the pain? People will use words sometimes like sharp, burning, achy.
[00:00:12]
[Speaker 2]: I'd say it's pretty sharp, yeah. <noise>
[00:00:18]
[Speaker 1]: Sharp OK. Anything that you have done tried since last night that's made the pain better?
[00:00:25]
[Speaker 2]: Um not laying down helps. <music>
[00:00:30]
[Speaker 1]: OK, so do you find laying down makes the pain worse?

If a draft transcript is already provided and it accurately matches the audio content, please skip to the next clip using the "Skip" button. Only correct drafts that contain errors or don't match the audio exactly. This helps maintain efficiency and avoid unnecessary work.

Correct PUNCTUATIONS are very important. Use your best judgement to determine positions in a sentence where punctuations are most appropriate, for example, ",", ".", ";", ":", "/", "-", "\", "(", ")", "?", "!", and so on should be added as appropriate. Brackets/parenthesis should be added as appropriate.
DO NOT WRITE PUNCTUATIONS IN FULL, e.g. "comma", "semi-color", use normal punctuation marks, e.g. , ; etc.

DO NOT include any words outside those heard in the clip. Do not attempt to translate, interpret, or explain what was said. Resist the urge to "correct" even grammatical mistakes in the clip provided. Resist the urge even if it seems more natural and sensible to you.

Do not abbreviate any word that was said. Avoid misspellings. Users with Transcripts with misspellings will be downgraded and lose their ability to earn on Transcription projects. Where a non-english word was heard, for example, other languages or pidgin English, Do NOT use colloquial or slang versions of spellings.

It is fine to use Slang or colloquial spellings or pidgin English ONLY when they are used in the audio.

If multiple words or audio segments are completely inaudible, or a long section of words is totally inaudible, ONLY transcribe audio segments with audible words. Skip the rest. DO NOT type any words in the completely inaudible segment of the clip EXCEPT you can hear or partially understand what was said.

For numbers, dates, times, urls, measurements or units like "milligram PER dl", please type using normal notation or contraction like "mg/dl", "12th August 2008", "11:45 pm". **DO NOT type these out in full**. For example, DO NOT type the year 2008 as "two thousand and eight".
If punctuations like 'comma' or 'full stop' are spoken in the audio, please transcribe with , or . as appropriate. DO NOT write them in full.
Type urls like google.com as "google.com" NOT "google dot come".

Weekly Quality Checks will be done. Users or Transcripts that do not comply with quality standards will be dropped. Make sure you regularly check the feedback you have received so you understand where you can improve. Consistently poor transcripts will get you blocked and any previous transcripts you have done will become unusable.

For a smooth recording experience please download the chrome browser from Google or update your chrome browser to the latest version.

Watch this Video tutorial on How to Check Payment Due Project Progress, Stats, and Payment History.

1. To check your recording progress and due payments, navigate to the project list page by clicking on the "View project" button on your dashboard, or use the "projects" item on the navigation menu.
2. On the project list page, you will see a table listing all projects. Locate the project you want to check stats/progress/payment for.
3. On the project row, there is a drop-down button (...) in the column called “Actions”.
4. Click the button with 3 dots. A drop-down menu for the project will appear.
5. On the drop-down for the project, click “My Stats/Pay” to view your progress, balances due, and other payment information.
6. All payment enquiries should be sent to **payments@intron.io**

1. Once you log in, navigate to your dashboard
2. On the dashboard, click on "View Projects"
3. On the Project List, select a Transcription project and click on "Transcribe"
4. You will be presented with a short audio clip.
5. Use the green "Play" button to play the clip, purple "pause" button to stop playback
6. The Next and Previous buttons can be used to navigate between clips
7. Use the White Skip button on the far left to skip very bad audio clips
8. Play the clip and listen carefully and type EXACTLY whatever was said
9. If you cannot make out the words in a section of the audio clip, simply type [inaudible] a continue typing the words you heard clearly

10. Read the Dos and Donts above for transcription guidelines and best practices
11. Make sure you click "Submit Transcript" after each clip is transcribed
12. Submission can sometimes take a few seconds depending on the length of the audio clip
13. Please wait till the next clip appears so you can transcribe again
14. We review your best 10 transcripts to make sure that they meet our quality standards before upgrading you to "paid" status.
15. You have a maximum of 20 attempts to qualify for paid status
16. Paid users are called "labelers" on the platform.
17. Clips Transcribed AFTER qualifying for "labeler" status are paid at the stated rate

Good Luck
